

Take action! The General Assembly is planning to vote on [HB 1800](#) next week – a bill that would make it harder for Pennsylvanians to vote in a secure, convenient, and accessible manner and would place barriers and additional burdens on parents, seniors, students, and election workers. In June, the legislature passed [HB 1300](#), which was vetoed by the governor. **They are back again with a new version of that same bill.** [HB 1800](#) is a cynical attempt to make voting harder and more inconvenient, make the system more confusing, change deadlines, roll back voter choice, reduce the availability of drop boxes and limit satellite election offices.

Pennsylvania has made huge strides towards making our elections more convenient, safer, and more accessible, and we should be building on that progress. During 2020 and 2021 elections, election officials did their job and worked around the clock to deliver safe and secure results. It is time for our legislators to do *their* jobs and fully fund and modernize our election systems.

They also are considering [HB 1596](#) legislation to make multiple changes to the Constitution, changing the deadline to cut people off from registering to voter closer to the election and including Voter ID restrictions.

To make the promise of democracy real, we must ensure that every Pennsylvania voter can cast a ballot to elect leaders who govern in our interests. **[Click here to contact your legislator](#) and tell them to reject HB 1800 and HB 1596.**
